

Experiential Learning for Graduate Students Student Guide for MS in Business Analytics

Experiential Learning for Graduate Students is an academic offering that enables eligible graduate students to participate in experiential learning opportunities related to their program of study. This guide is intended to help you select an appropriate position *likely* to receive approval but does not replace the formal [Experiential Learning application process](#).

Students in the MS in Business Analytics program may perform typical functions as listed below. The positions and associated duties can range from entry-level to senior-level.

1. Employ analytical methods to derive insights from business data
2. Create visual interpretations of data-driven insights for various business situations
3. Assess and ensure the ethical use of data

Sample job title search terms

- Business intelligence analyst
- Data analyst
- Financial analyst
- Quantitative analyst
- Marketing analyst

Note: This is only a sample list and does not include every possible, acceptable position function for your program of study. Position titles alone do not represent position duties.

Please consult your Program Chair with any questions about position descriptions or duties as it relates to your program of study.
