Professional Licensure Programs
A professional license is typically regulated by state laws and is required for graduates of these programs to practice, to use the professional designation in their title, and/or to gain employment in certain occupations.

The post-baccalaureate Primary Education educator preparation program is designed to prepare students for a career as a licensed teacher.

State Licensure
Requirements for teacher licensure vary by state and may involve more than successful degree completion. Graduates who apply for a license may need to satisfy other requirements, such as passing an examination, completing an application, and submitting to a background check. Some states have different processes and requirements for applicants who have completed their academic program in a different state.

Educational requirements for teacher licensure can include specifications for the applicant's type of academic degree, type of educational institution where the academic program was completed, and curriculum content within the academic program. Some states offer multiple pathways to teacher licensure, including recognizing a license earned in another state or providing options for qualified professionals who wish to transition into the education field. The lists below pertain only to the educational requirements to obtain an initial state teaching license. Alternative pathways to licensure and additional requirements, other than educational, are not considered in these lists.

Franklin University makes every effort to ensure the information provided on educational requirements for licensure is accurate and up-to-date; however, these requirements are subject to change at any time. Students who will be seeking licensure as a teacher are strongly encouraged to visit the associated agency website (linked in the lists below) in the state in which they intend to teach to review all requirements to obtain licensure. Note: If links are not provided, a website for the regulatory agency in that location is currently unavailable.

Please note: Students enrolled in the University's educator preparation programs are only approved to participate in field experiences and/or student teaching in the state of Ohio.

Program Curriculum Meets State Educational Requirements
Ohio (Ohio Department of Education)

Program Curriculum Does Not Meet State Educational Requirements
Alabama (Alabama State Department of Education)
California (Commission on Teacher Credentialing)
Colorado (Colorado Department of Education)
Florida (Florida Department of Education)
